**DETAILED ACTION*****Response to Arguments***

Applicants' traversal of the restriction (paper filed 2/5/2007) has been fully considered but they are not persuasive. The examination and prosecution of different species in one application would be a serious burden, especially the invention of the application is in a very crowded stent art and there are too many claims and references to be considered.

In addition, the Applicants have elected the invention as shown in Fig. 3 and claims 1-7, 9-13, 20-25, 27-28, 30-33, 35-36, and 67-94 for examination (paper filed 2/5/2007). However, the claims have been canceled in the preliminary amendment filed 7/14/2003, which amendment canceled claims 1-94 and add new claims 95-196.

Applicants are required to confirm the non-canceled claims read on Fig. 3 for further examination on the merit.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting

ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

At least claims 95-98, 102-103 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6, 8-12, 14-17 of U.S. Patent No.

7,141,062 and over claims 1-3, 5-6, 9-11, 13-15, 17, 21-22 of U.S. Patent No. 6,723,119.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they claims the main features of the inventions such as first loop containing section of first frequency having wider legs, second and third loop containing sections of second frequency higher than first frequency having thinner legs, triangular cells.
